

1

ABSTRACT OF THE DISCLOSURE

2 A portable system for inputting, editing, and outputting
3 digital multimedia data, that includes a PCMCIA memory card, a
4 camcorder, a digital camera, a TV, and a computer. The camcorder,
5 the digital camera, or the VCR directly receives therein the PCMCIA
6 memory card, and records thereon, digital multimedia data of what
7 is being recorded by the camcorder, the digital camera, or the VCR.
8 The TV is operatively connected to the VCR. The VCR alternatively
9 directly receives therein the PCMCIA memory card and allows the TV
10 to play the digital multimedia data stored on the PCMCIA memory
11 card directly received in the VCR. The computer directly receives
12 therein the PCMCIA memory card, and saves thereon, digital
13 multimedia data of what is being saved by the computer. The
14 computer, alternatively, directly receives therein the PCMCIA
15 memory card and plays the digital multimedia data recorded on the
16 PCMCIA memory card by one of the camcorder, the digital camera, the
17 VCR, and the computer, respectively. The computer, alternatively,
18 directly receives therein the PCMCIA memory card and allows the
19 digital multimedia data recorded on the PCMCIA memory card by one
20 of the camcorder, the digital camera, the VCR, and the computer,
1 respectively, to be edited.
